

ERRATA FOR:

Glick, Doshi, Sonnad, and Polsky
Economic Evaluation in Clinical Trials
Oxford: Oxford University Press. 2007.

There are always things we would like to change about what we have written. Some are substantive, some are stylistic, and some are typographical errors that we failed to identify during the proof reading process. Among the latter, some are simply annoying. Others, however, get in the way of the reader's understanding of what we meant to say. This file addresses this latter type of problem. Any help readers wish to provide in identifying these errors is appreciated.

LAST UPDATED 02/17/07

Chapter 5

P 96, last line of Table 5.2

Table entries as they appear in the book			
$\exp^{(\text{mean ln})}$	24.662	39.993	44.247
Corrected Table entries			
$\exp^{(\text{mean ln})}$	24.662	36.993	44.247

Chapter 7

P. 143

Text as it appears in the book

"We recommend plotting the difference in effect on the Y axis and the difference in cost on the X axis."

Corrected text

"We recommend plotting the difference in effect on the X axis and the difference in cost on the Y axis."
